Dear Sir:

Enclosed for filing in the above-identified application is a Supplemental Information Disclosure Statement by Applicant (PTO/SB/08 equivalent) listing one hundred and ten (110) references to be considered by the Examiner. Copies of all the non-patent references are submitted pursuant to 37 C.F.R. § 1.98(d). Copies of related applications in the Non Patent Literature Documents section are not enclosed as the Applicant understands that the Examiner will be able to analyze the patent references using an electronic database. As provided by 37 C.F.R. § 1.97(h), the filing of this Supplemental Information Disclosure Statement shall not be construed as an admission that the cited references are material to patentability. Additionally, inclusion on this list is not an admission that any of the cited documents are prior art in this application. Further, Applicant makes no representation regarding the completeness of this list, nor represents that better art does not exist.

In an abundance of caution, Applicant has also pointed the Examiner's attention to a number of commonly owned issued patents and pending applications. These references do not share a common priority claim but may include related subject matter. These cited references could potentially include prosecution history relevant to the currently pending claims.

In accordance to M.P.E.P. § 2001.06(c), a number of the references identified herewith correspond to the existence of litigation and other information arising from litigation. The owner of the patents and applications, Ben Huang, and his company, Winn, Inc., has pursued various

Karakal Far East Ltd., et al., U.S. District Court for the Central District of California (Southern Division), 8:05-CV-00168 CJC (RNBx). The Court has previously advised the U.S. Patent and Trademark Office of the filing of this law suit in accordance with 35 U.S.C. § 290. This law suit has not proceeded to trial nor final judgment. The parties have exchanged initial disclosures and have stipulated to a preliminary injunction.

In addition, four (4) other U.S. patents have been involved in litigation: 5,695,418; 5,797,813; 5,857,929; and 6,244,975. In an abundance of caution, Applicant provides below the case numbers for the litigations involving these patents and a brief statement of which patents were involved in each and the current status of the cases. In the non-patent references section, Applicant has provided the Examiner with copies of some documents from several of these litigations. If the Examiner so requests, Applicant can provide the Examiner with copies of any other documents from these litigations that the Examiner believes may provide relevant information to the present application.
